Updates – December 2020

Lesson #2 from improving quality of care during COVID-19: Adapt and innovate to support quality improvement teams in India and Bangladesh

Thursday 10 December at 10 am GMT, 3.30 pm IST

Second webinar in a series on Lessons from improving quality of care during COVID-19

Community of Practice
[Watch live on YouTube](#)

This webinar will share two examples from India and Bangladesh, where quality improvement initiatives for maternal and newborn care looked for opportunities to continue their work during COVID-19. In India, the [Nationwide Quality of Care Network](#) leveraged technology to build health workers capacity during the pandemic, and brought together a broad partnership to create a digitized learning network. In Bangladesh, quality improvement teams built on their experience during COVID-19 to expand their work to pediatric care, and care for small and sick newborns.

WEBINAR - THURSDAY 10 DECEMBER 2020 AT 10 AM GMT, 3.30 PM IST

[REGISTER](#) and add to your calendar
[WATCH LIVE](#) on Youtube
[REQUEST](#) to join the Quality of Care community of practice

This webinar will share two examples from India and Bangladesh, where quality improvement initiatives for maternal and newborn care looked for opportunities to continue their work during COVID-19.

In **India**, the [Nationwide Quality of Care Network](#) leveraged technology to build health workers' capacity during the pandemic, and brought together a broad partnership to create a digitized learning network.

In **Bangladesh**, quality improvement teams built on their experience during COVID-19 to expand their work to pediatric care, and care for small and sick newborns.

Speakers:

- Dr. Rajesh Mehta, Regional Adviser - Newborn, Child and Adolescent Health, World Health Organization
- Dr. Deepthi Agrawal, National Professional Officer, World Health Organization, New Delhi office
- Dr. Vikram Datta, President, Nationwide Quality of Care Network, India
- Dr. Samia Kaiser, District Coach, National Institute of Preventive and Social Medicine (NIPSOM) Bangladesh

This is the second webinar in the 'Lessons from improving quality of care during COVID19' series, organized by the Network for Improving Quality of Care for Maternal, Newborn and Child Health and the World Health Organization.

Maintaining quality essential health services during COVID-19: Learning from country experiences

3 December 2020, noon to 2pm GMT

Hosted jointly by the WHO COVID-19 Health Services Learning Hub (HLH) and the WHO Global Learning Laboratory (GLL) for Quality UHC.

This learning event will bring together policymakers, health professionals and technical partners to identify and solve common challenges in maintaining quality care during COVID-19.

Speakers in this event will:

1. Explore strategies undertaken by countries to integrate quality into the maintenance of essential health services during COVID-19;
2. Identify common barriers and solutions in maintaining quality care during COVID-19;
3. Recognise common learning themes and technical assistance needs from countries.

The Network for Improving Quality of Care for Maternal, Newborn and Child Health (Quality of Care Network) works to ensure that every pregnant woman and newborn receives good quality care throughout pregnancy, childbirth and the postnatal period, with the ambitious goal to halve maternal and newborn deaths and stillbirths in health facilities within five years in the participating countries.

The Quality of Care Network is led by countries that are already taking leadership to improve quality of care in health services: Bangladesh, Côte d'Ivoire, Ethiopia, Ghana, India, Kenya, Malawi, Nigeria, Sierra Leone, Tanzania, and Uganda. More countries are expected to join the Network. It is backed by the World Health Organization, UNICEF and UNFPA, and supported by a growing partnership of development organisations, NGOs, professional associations and universities.

It is underpinned by the values of quality, equity and dignity and contributes to achieving the targets of the *Every Woman Every Child Global Strategy for Women's, Children's and Adolescents' Health*.
