

Quality, Equity, Dignity

A Network for Improving Quality of Care
for Maternal, Newborn and Child Health

14-16 February 2017
Lilongwe, Malawi

Implementation and Learning

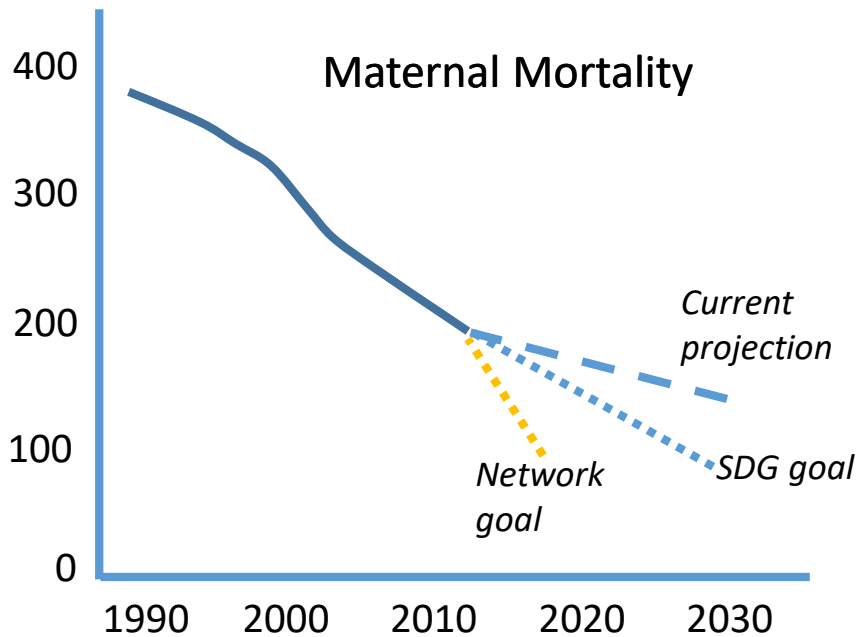

Pierre Barker

Institute for Healthcare Improvement

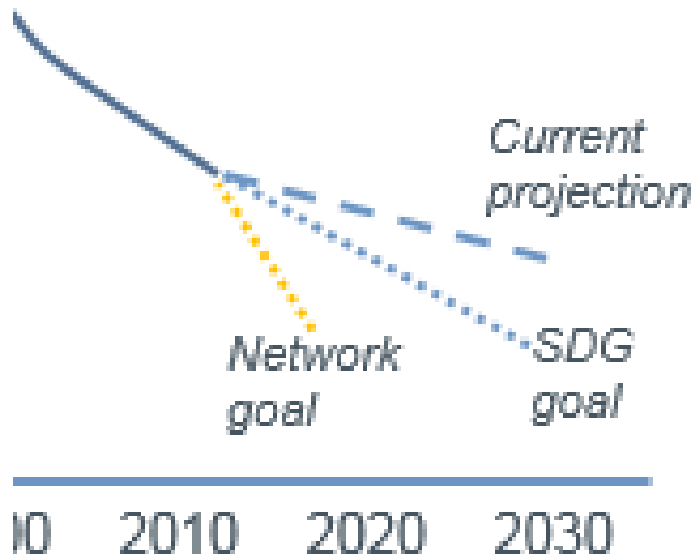

Accelerating the Pace of Reducing Maternal and Newborn Mortality

What Design will Get Us to Dramatic Network Goals?

1. Reduce maternal and newborn deaths and stillbirths in participating health facilities **by 50% over five years**
2. Improve experience of care – enable **measurable improvement in user satisfaction** with the care received

“Every System is Perfectly Designed to Get the Results it Gets” – Paul Batalden

Quality, Equity, Dignity

A Network for Improving Quality of Care
for Maternal, Newborn and Child Health

We know there is a Better Design..... 4

$$S + P = O$$

Structure + Process ^{+ Context} =
Outcomes

Quality, Equity, Dignity

A Network for Improving Quality of Care
for Maternal, Newborn and Child Health

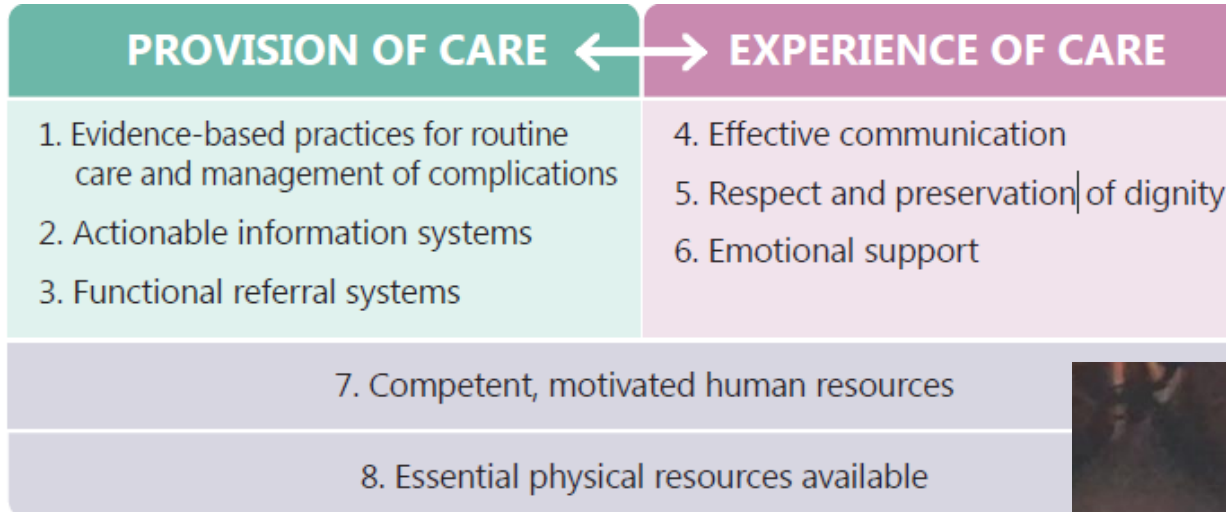

August 2016: mid-winter

- A baby is born at ~ 2000g at night with moderate asphyxia
- Resuscitated successfully but requires O₂ (via electric concentrator), cared for in cot in nursery.
- Power outage in early evening
- Initial backup generator is fired up, but runs out of fuel after 2 hours.
- Power failure results in O₂ concentrator failure, heater failure.
- Staff dispatched to town to get more fuel
- Baby gets cold, hypoxic, develops respiratory distress and dies before power comes back on.

Moving from “What” to “How”

Quality, Equity, Dignity

A Network for Improving Quality of Care
for Maternal, Newborn and Child Health

A Better System Design: Bring Together 2 Types of Knowledge

- Protocols
- Guidelines
- Standards

Evidence-based
Subject Matter
Knowledge

Implementation
Knowledge

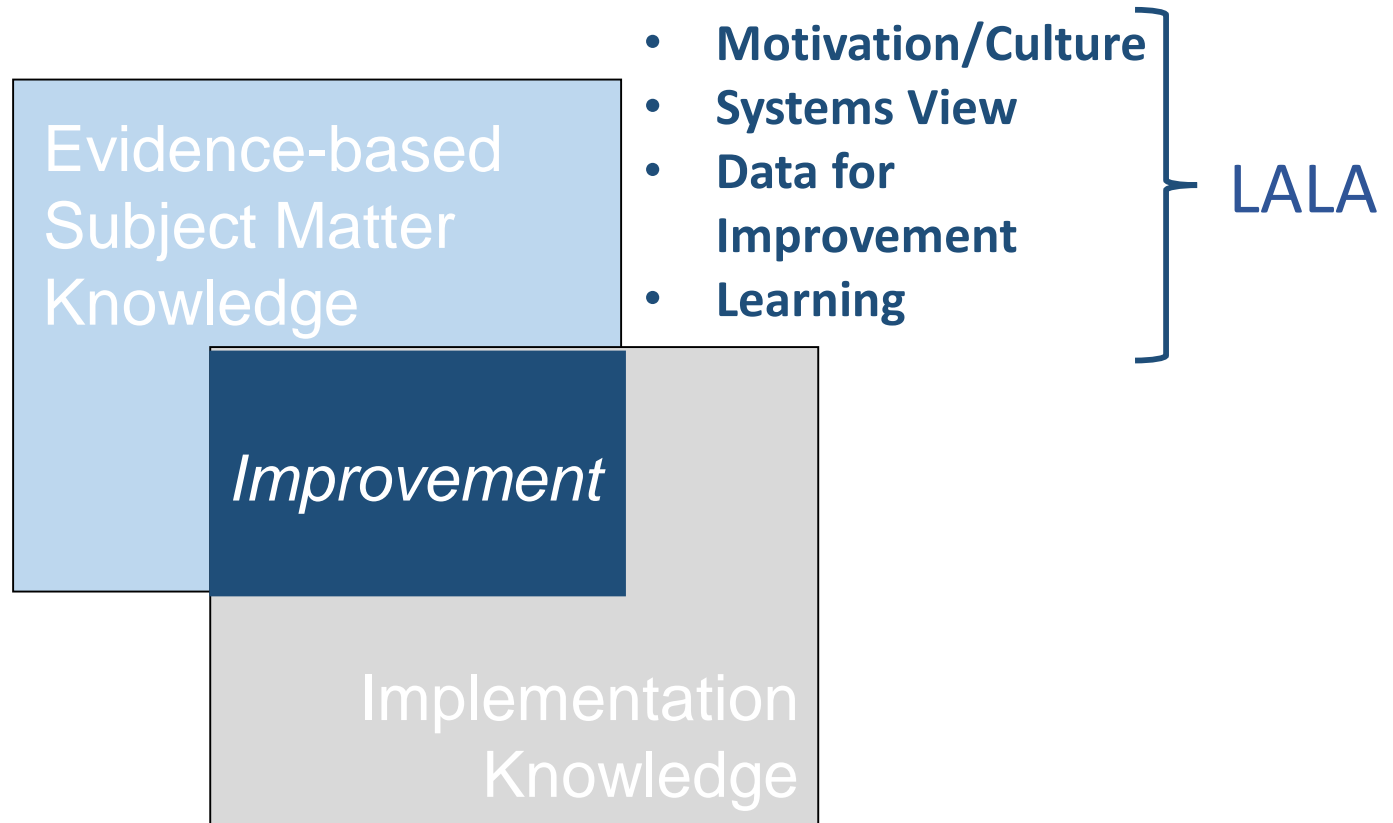

1. Leadership/governance
2. System re-design
3. Financial strategies
4. Resources
5. Engaging women & families
6. Clinical/systems training
7. Data
8. Learning communities

Quality, Equity, Dignity

A Network for Improving Quality of Care
for Maternal, Newborn and Child Health

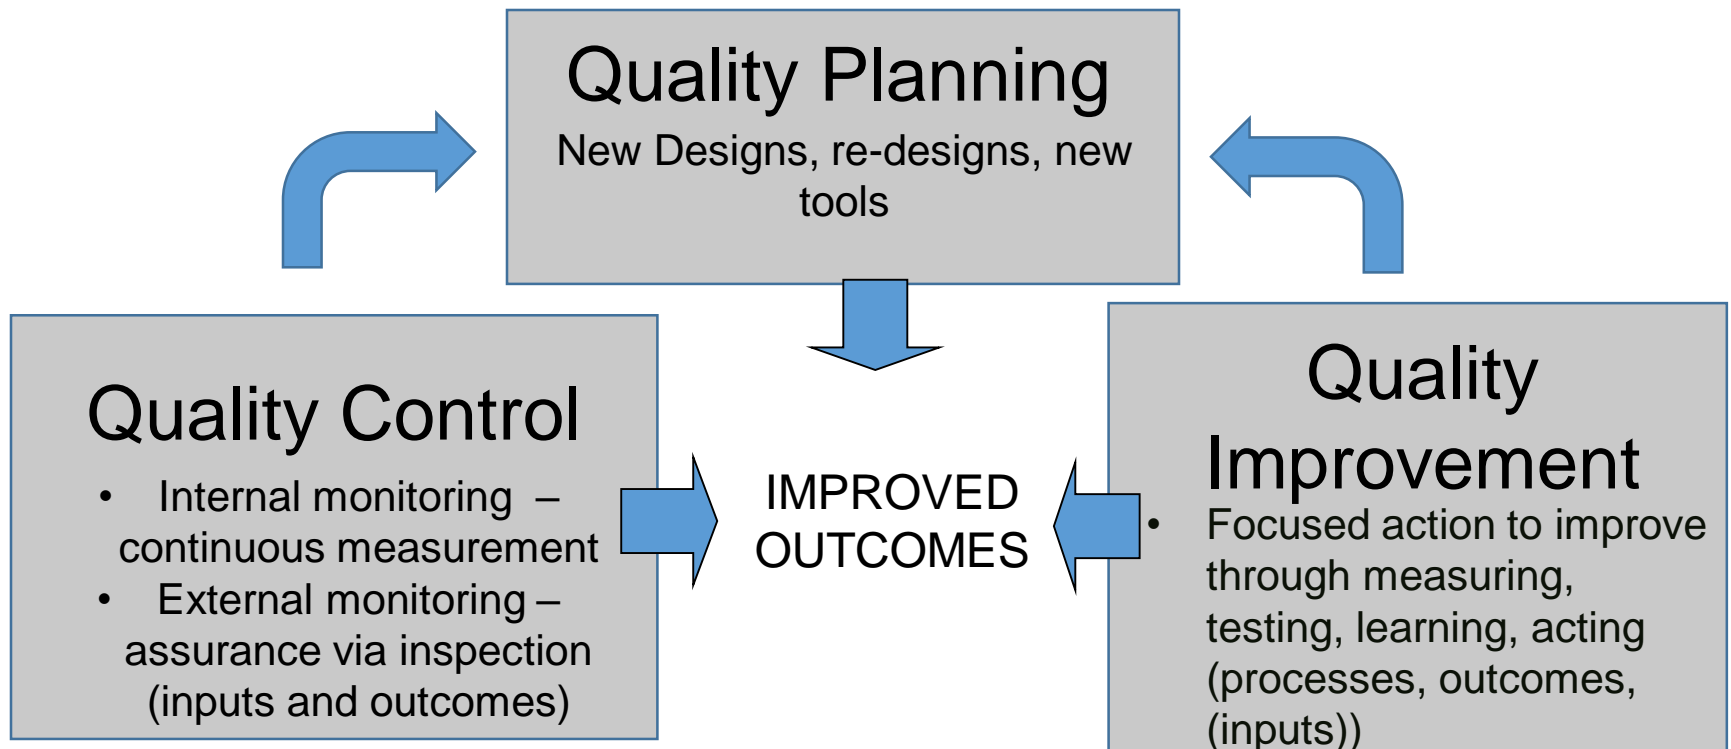

A Better System Design: Bring Together 2 Types of Knowledge

Leadership and Management

Quality structures (e.g. Quality Directorate), data systems, learning system, sense making, strategic deployment, building capability

- **Will and optimism**
- **Enabling and learning culture** - not command and control.
 - Continuous data inputs
 - Data for learning vs for judgement
- **Integrated** QoC leadership and governance
- **Accountability** (fund, engage, “monitor, review, act”)

Quality, Equity, Dignity

for Maternal, Newborn and Child Health

Action

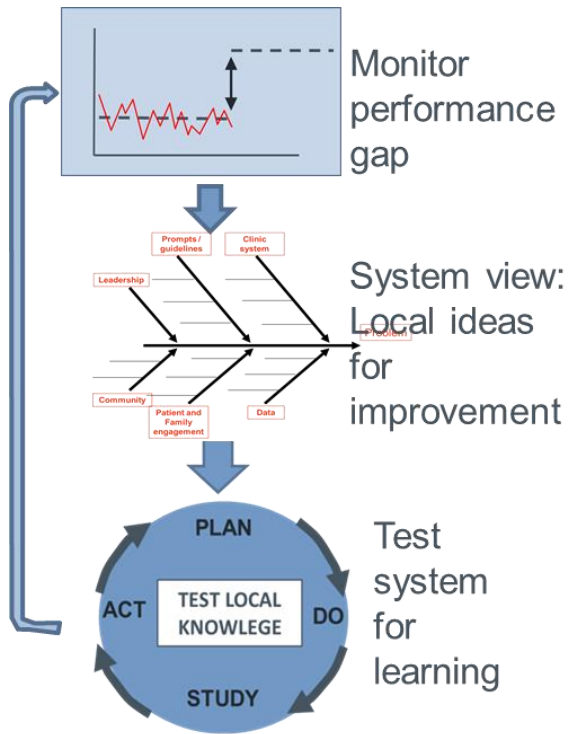

JUST DO IT.

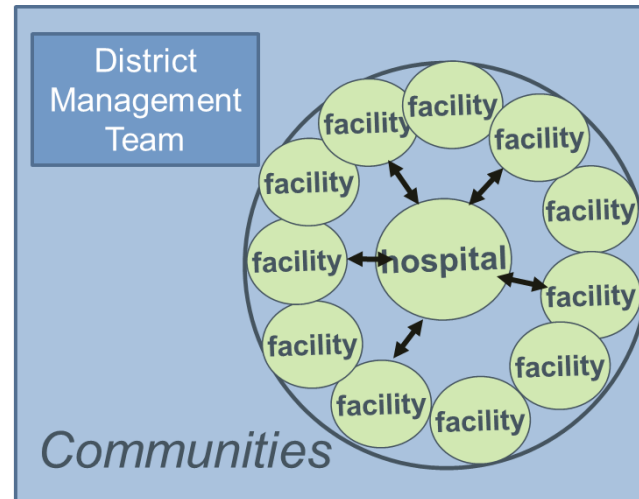

3 Levels of Implementation and Scale-up: Facility, District, National

Facility-based learning and Implementation

District-led learning: Connecting the Facilities and Communities

Supportive Supervision

District Convening

National Scale up: incorporates learning from facilities and Districts

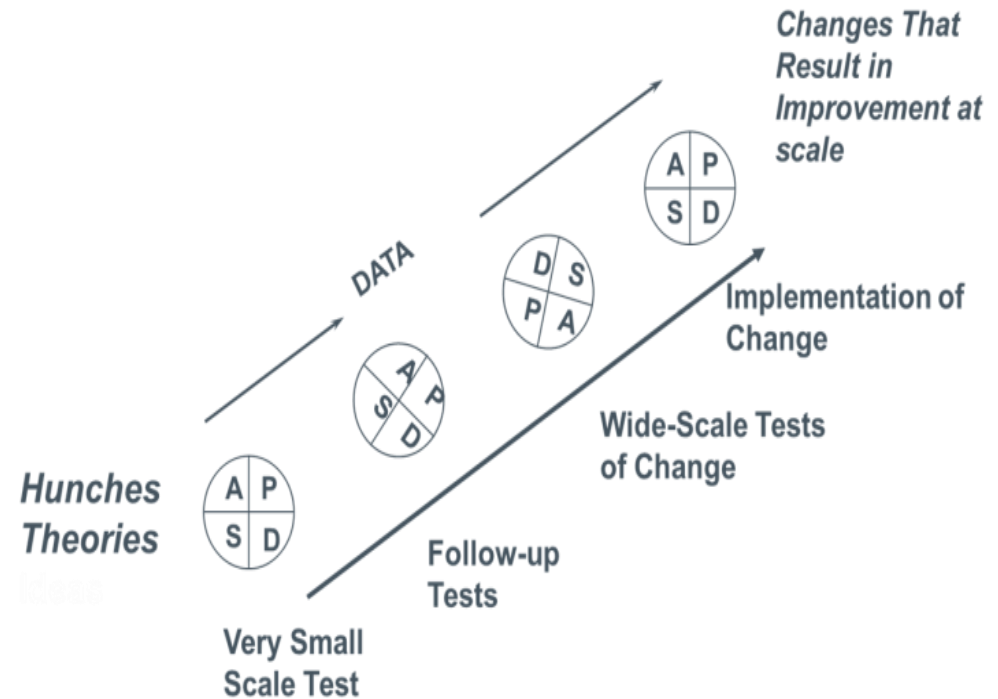

Definition: Externally inspired health projects (“hot spots”) that are not integrated with country health care plans and disappear after project ends

Projects At Risk of Pilotitis

- Not co-designed and led from within country health system
- Not designed for scale up
- Not designed for sustainability (often over-resourced)
- Costs a lot with small impact
- Often dies after publication

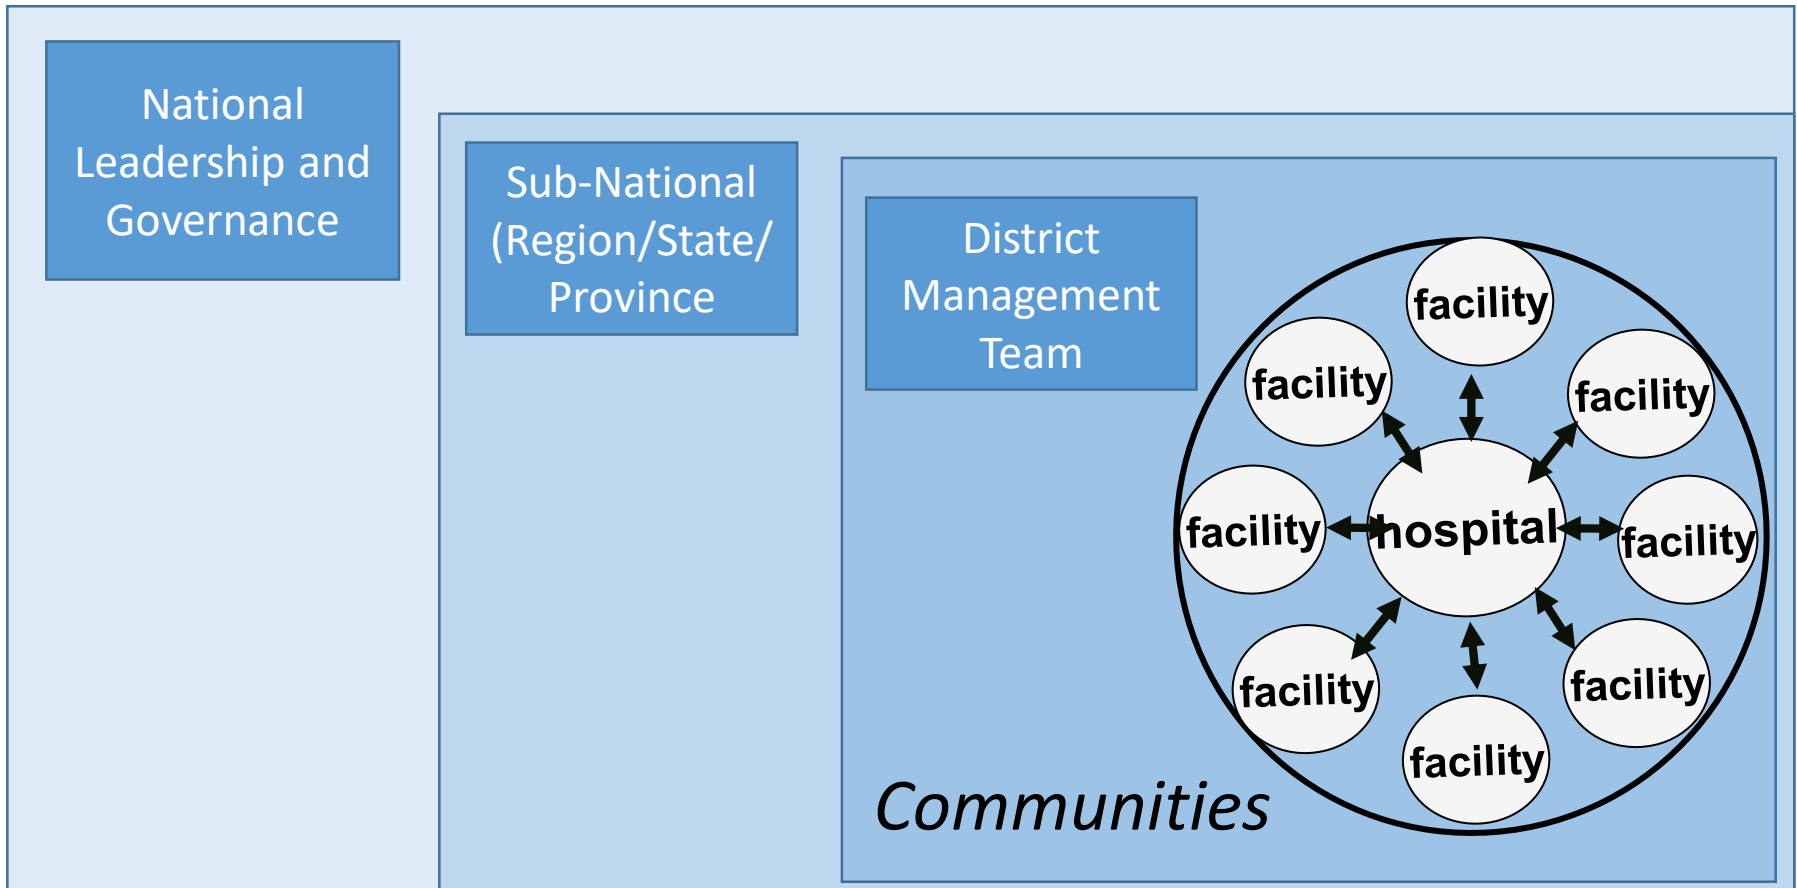

- “Adaptation not Replication” -implement and scale up to the local context - what works here may not work there
- Change ideas come from outside (disruption) and inside (context based improvement)
- Start small, failure is OK.
- Harness learning at district, region, national and global level

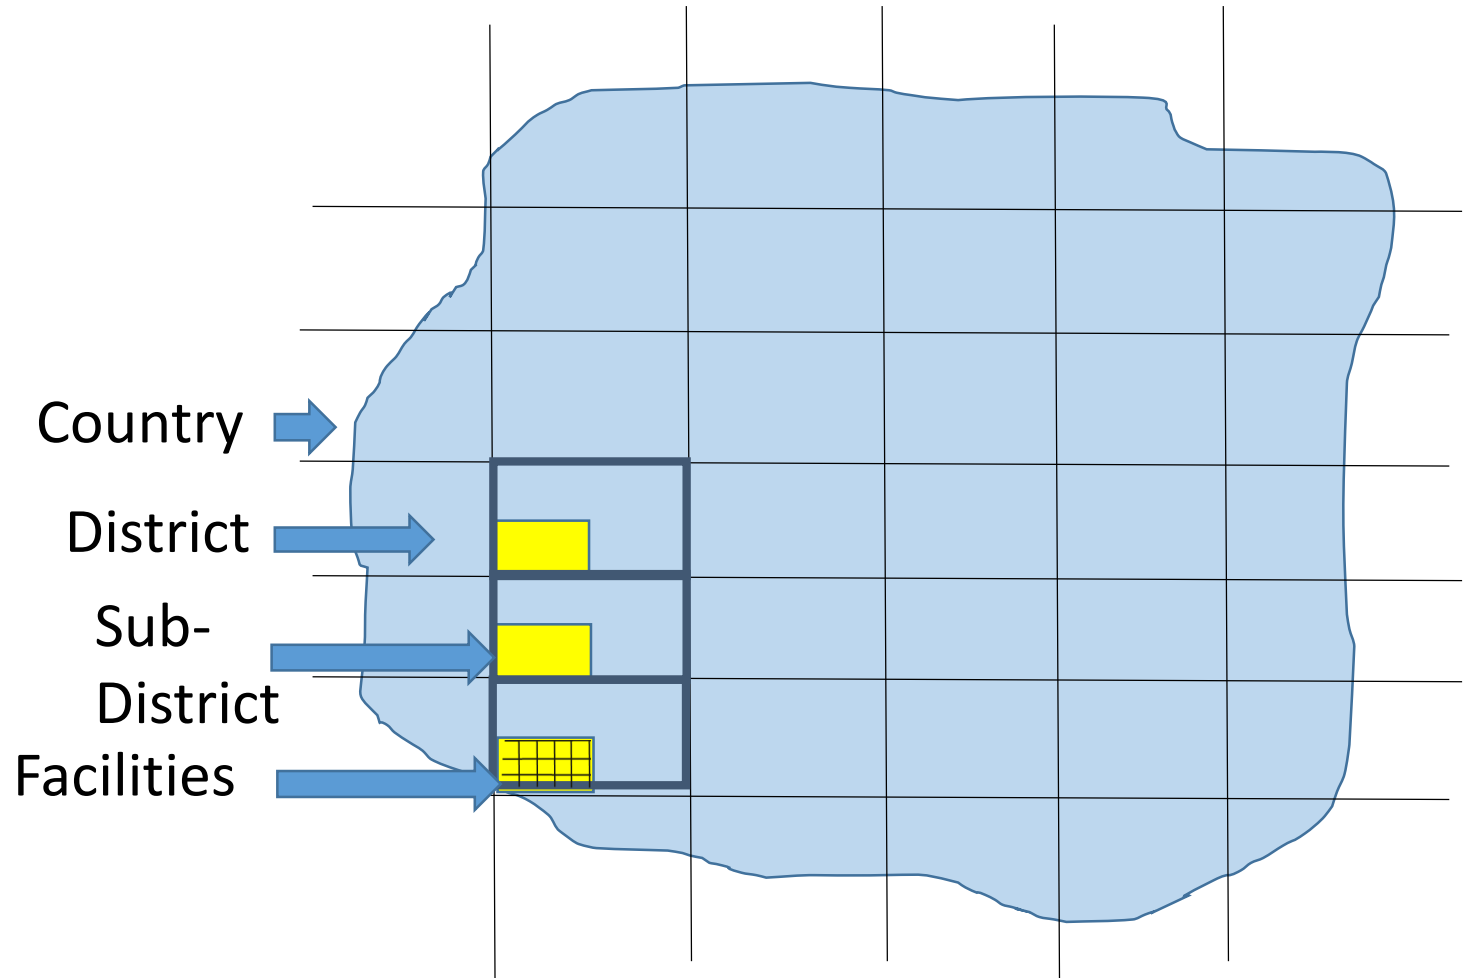

The Health District: Unit of Learning and Scale-up

Scale-Up Design: Step 1 – Test in a few districts on a small scale

Sequential Scale-Up Design

Example: Ghana Scale up of MCH Services (Project Fives Alive)

Unprecedented Learning Between Countries and Partners

Quality, Equity, Dignity

A Network for Improving Quality of Care
for Maternal, Newborn and Child Health

Huge Opportunity for Cross Country Learning

Leadership
Functional Leadership Structure for Quality Improvement
Quality of Care Committees established in District Health Management Teams
Plans, strategies & standards
National Quality of Care Strategy for the Health Sector
National Strategy for Maternal and Newborn Health addresses Quality of Care
National Quality of Care Standards and Protocols
Data
National Situational Analysis for Quality of Care up to date
Assessment of Quality of Care in Health Facilities completed in the past two years
Supporting systems
Maternal and Perinatal Death Surveillance and Response System established
13 Maternal and Newborn Lifesaving Commodities on the Essential Medicine list
Water Coverage in Health Care Facilities (%)
Skilled attendance at delivery (%)
National Availability of EmOC (%)

Country Readiness for Quality Programming

Quality, Equity, Dignity

A Network for Improving Quality of Care
for Maternal, Newborn and Child Health

Learning System:

Build Will and Community

- Common goals and methods
- Accountability to each other
- Commitment to learning
- Transparency and trust

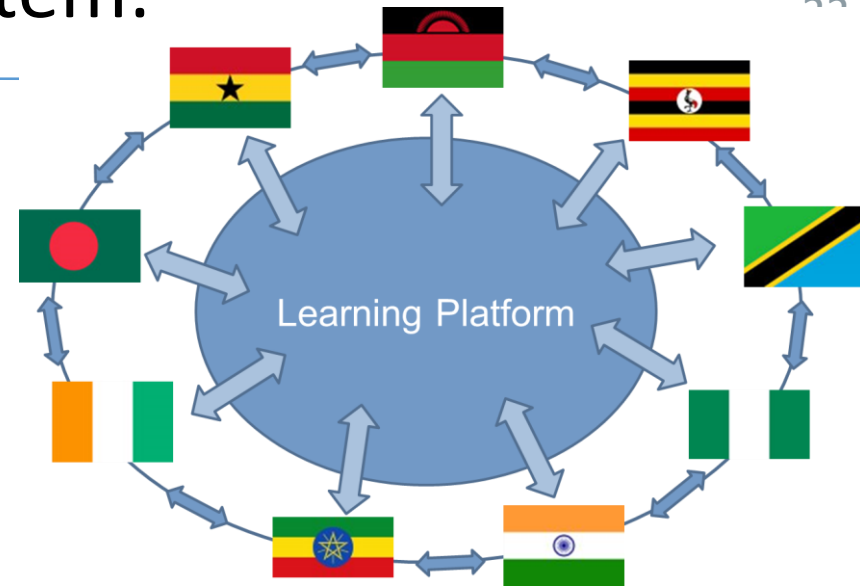

Foster Learning

- Face-to-face and virtual
- Share successes and challenges
- Share comparable metrics

Make Knowledge Resources Available

- Static information and tools
- Know-how and experience
- www.qualityofcarenetwork.org

Quality, Equity, Dignity
A Network for Improving Quality of Care for Maternal, Newborn and Child Health

THE NETWORK • QUALITY OF CARE • KNOWLEDGE RESOURCES • COMMUNITIES OF PRACTICE • COUNTRY DATA • CONTACT

The Network for Improving Quality of Care for Maternal, Newborn and Child Health works to ensure that every pregnant woman and newborn receives good quality care throughout pregnancy, childbirth and the postnatal period.

It will look at quality of care both in the way it is delivered by health workers, and experienced by patients and be underpinned by the values of quality, equity and dignity.

Introduction

Quality of care in health services is essential for achieving universal health coverage and the

adolescent can thrive to realize their full potential, resulting in enormous social, demographic and economic benefits.

1. Leadership Structures for Quality
2. Build the coalition
3. Assess the baseline
4. Adapt the QoC standards
5. Ensure essential resources
6. Select the starting districts
7. Build the learning system
8. Plan ahead for scale up
